INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference STADM-66931	FOR FURTHER see Form PCT/ISA/220 ACTION as well as, where applicable, item 5 below.			
International application No. PCT/US04/00947	International filing date (day/month/year) 15 January 2004 (15.01.2004)	(Earliest) Priority Date (day/month/year) 15 January 2003 (15.01.2003)		
Applicant SABEUS PHOTONICS, INC.				
This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau. This international search report consists of a total of				
may, within one month from 6. With regard to the drawings, a. the figure of the drawings to be as suggested by the as selected by this	1, according to Rule 38.2(b), by this Authority in the date of mailing of this international search published with the abstract is Figure No. 1	ch report, submit comments to this Authority.		
b. none of the figures is to be published with the abstract.				

Interchal application No.

PCT/US04/00947

Box IV TEXT OF THE ABSTRACT (Continuation of Item 5 of the first sheet)

The technical features mentioned in the abstract do not include a reference sign between parentheses (PCT Rule 8.1(d)).

NEW ABSTRACT

A fiber optic sensor assembly capable of deployment down an instrumentation tube (6) located in a well bore (12), including a flexible protective tube (28) having a lumen encasing an optical fiber having a core portion and a cladding portion disposed within the flexible tube. The flexible protective tube protects the optical fiber from the oil, water or hydrogen gas within the well bore. A method of deploying the optical fiber down the well bore, is also provided. An optical fiber having a core and cladding surrounded by the flexible protective tubing is deployed into the lumen of a tube disposed within the well bore by pumping a high pressure fluid into the lumen of the tube, thereby causing the deployment of the optical fiber down the well bore. The protective tubing is impermeable of hydrogen and other corrosive materials.
